

CRAFTCONNECT

AI-Powered Digital Business Assistant for Marginalized Artisans

1. OVERALL ARCHITECTURE

User experience

One mobile app

- Artisan Mode
- Buyer Mode

Admin

Separate Web Dashboard

Backend

Common for everyone.

2. ARTISAN MODE — MAIN FEATURES

A. Onboarding

Open App

Select Language

Create Profile

Artisan Identity / Eligibility Verification

Artisan Home

Includes

- Language selection
 - Local/regional language support
 - Voice-first interaction
 - Simple visual UI
 - Artisan profile
 - Identity/eligibility verification
 - Help / Voice Assistant
-

3. ARTISAN PRODUCT CREATION

This is the main AI workflow.

ADD PRODUCT

AI-GUIDED PHOTO CAPTURE

TAKE PHOTO

AI IMAGE ENHANCEMENT

SPEAK ABOUT PRODUCT

IMAGE + VOICE UNDERSTANDING

AI ATTRIBUTE EXTRACTION

MISSING / UNCERTAIN INFORMATION

AI CATALOG + DESCRIPTION

ARTISAN LISTENS

↓
VERIFY / CORRECT THROUGH VOICE
↓
AI PRICING ASSISTANT
↓
FINALIZE PRICE
↓
SAVE PRODUCT TO MY PRODUCTS

Important:

Yahin **product creation flow end hota hai.**

Artisan ko immediately publish karna compulsory nahi hai.

4. AI-GUIDED PHOTO CAPTURE

AI artisan ko photo lene mein guide karega.

Checks

- Lighting
- Framing
- Angle
- Product visibility
- Image quality

Example:

“Photo thodi dark hai. Product ko light ke paas rakhiye.”

5. AI IMAGE ENHANCER & STUDIO

AI can:

- improve lighting
- remove/clean distracting background
- improve crop/framing
- enhance image quality

Authenticity rule

AI must preserve:

- real colour
- texture
- shape
- design
- craftsmanship

It should **not artificially redesign the product**.

6. VOICE-TO-CATALOG

Artisan simply speaks in their selected language.

Example:

“Ye bamboo ka basket hai, maine haath se banaya hai...”

AI extracts relevant information such as:

- Product name
 - Category
 - Craft type
 - Material
 - Colour
 - Size/dimensions
 - Usage
 - Craft details/story
 - Other relevant attributes
-

7. ADAPTIVE AI QUESTIONS

No long form.

AI checks what it already knows.

If something is missing or uncertain:

Only then ask.

Example:

“Ek mahine mein kitne baskets bana sakte ho?”

If AI is uncertain about a field, it asks artisan to confirm instead of silently guessing.

8. AI CATALOG GENERATION

AI generates:

- Product title
 - Category
 - Structured attributes
 - Professional description
 - Craft-aware description
 - Craft/story information
 - B2B-friendly specifications
-

9. ARTISAN VOICE VERIFICATION

This is **product-information verification**, not KYC.

AI reads/speaks the generated information in artisan's language.

Example:

“Maine samjha ki ye bamboo ka handwoven basket hai, 2 feet ka hai. Kya ye sahi hai?”

Artisan says:

“Haan.”

or:

“Nahi, size 1.5 feet hai.”

AI updates it.

AI Generated Information

AI Reads It In Artisan's Language

Artisan Confirms / Corrects

Final Verified Product Information

10. AI DYNAMIC PRICING ASSISTANT

AI considers:

- Material cost
- Labour
- Labour/time
- Craftsmanship
- Relevant handmade market prices
- Comparable products

Output:

Suggested Price Range

-

Why this price?

Example:

Suggested range: ₹420–₹480

Artisan:

Accept / Edit

Important

AI does **not** impose the price.

Artisan decides the final price.

11. PRODUCT SAVED TO MY PRODUCTS

After pricing is finalized:

PRICE FINALIZED

PRODUCT SAVED

MY PRODUCTS

Product status can be:

- Draft
- Ready to publish
- Published
- Needs update

Artisan can leave it there and publish later.

12. MY PRODUCTS

Artisan can:

- View products
 - Edit
 - Re-verify
 - Update
 - Publish
 - Republish
 - View status
 - View basic performance insights
-

13. PUBLISHING FLOW — SEPARATE FROM PRODUCT CREATION

Whenever artisan decides to publish:

MY PRODUCTS

SELECT PRODUCT

PUBLISH

B2B READINESS CHECK

B2B Readiness checks:

- Photos
- Product details
- Price
- MOQ
- Available quantity

- Production capacity
- Lead time
- Customization capability
- Location

If something missing:

Missing Information

Complete Required Details

B2B Ready

Then:

Publish

14. CAPACITY MANAGEMENT

Artisan can maintain:

- Current stock
- Available quantity
- Weekly/monthly production capacity
- Average production time
- Availability

This information supports:

B2B matching + quotation + bidding + readiness.

15. NORMAL B2B FLOW

BUYER

POST REQUIREMENT

AI UNDERSTANDS / STRUCTURES REQUIREMENT

16. BUYER MODE — SAME MOBILE APP

Buyer logs in to the same CraftConnect app but enters **Buyer Mode**.

Buyer Home

BUYER HOME

Search / Discover
Post Requirement
My Requirements
Matched Artisans
Inquiries
Quotes
Orders

Bidding Sessions
Saved Suppliers
Notifications
Business Profile

17. BUYER ONBOARDING

Buyer can provide:

- Business/organization name
- Business type
- Industry/category
- Location
- Contact details
- Relevant verification information

Buyer receives a verification/trust status.

18. BUYER DISCOVERY

Buyer can:

Search Products

or

Browse Artisans

or

Post Requirement

So buyer isn't forced into one path.

19. AI POST REQUIREMENT

Buyer can **type or speak**.

Example:

“Mujhe 500 handmade bamboo baskets chahiye, 30 days mein.”

AI structures it into:

Product
Quantity
Budget
Deadline
Customization
Location
Other Requirements

Buyer confirms.

20. SMART ARTISAN MATCHING

Matching considers:

- Craft
- Product
- Quantity
- MOQ
- Available stock
- Production capacity
- Lead time
- Price
- Customization
- Availability
- Location

And buyer gets the reason.

Example:

92% Match

- ✓ Product
 - ✓ Quantity
 - ✓ Capacity
 - ✓ Lead time
 - ✓ Customization
-

21. PRODUCT / ARTISAN DETAIL

Buyer sees:

Product

- AI-enhanced images
- Product details
- Material
- Craft
- Price
- MOQ
- Available quantity
- Capacity
- Lead time
- Customization
- Location

Artisan

- Profile
 - Craft
 - Verification/trust status
 - Experience
 - Craft story
-

22. ARTISAN COMPARISON

Example:

	Artisan A	Artisan B
Price	₹450	₹430
MOQ	50	100
Capacity	500	300
Lead Time	20 days	15 days
Customization	✓	✓
Verification	✓	✓

23. B2B INQUIRY / RFQ

Buyer sends:

- Quantity
 - Specifications
 - Deadline
 - Customization
 - Delivery location
 - Other requirements
-

24. AI B2B VIRTUAL BUSINESS MANAGER

Buyer → Artisan

Buyer:

“We require 500 units with customized dimensions and delivery within 30 days.”

AI gives artisan:

“**Buyer ko 500 pieces chahiye, size customization ke saath, 30 din mein.**”

Artisan → Buyer

Artisan can speak:

“500 pieces possible hain, 28 din lagenge.”

AI converts it into appropriate business language for the buyer.

So:

Buyer Requirement

AI Understanding + Simplification + Translation

Artisan Local Language

25. STRUCTURED CUSTOMIZATION

Customization can cover:

- Size
 - Colour
 - Pattern
 - Packaging
 - Logo/branding
 - Other modifications
-

26. CAPACITY CONFIRMATION

Buyer sees:

Confirmed

Partial

Declined

based on artisan response.

27. QUOTATION

Quote includes:

- Unit price
- Quantity
- MOQ
- Lead time
- Customization
- Delivery
- Terms

Buyer:

Accept / Request Change / Reject

28. NEGOTIATION

If needed:

- Price changes
- Quantity changes
- Term changes
- Quote versions
- Clear history

No unnecessary complicated contract system.

29. AGREEMENT → ORDER

Once terms are finalized:

Final Terms

↓

Agreement / Confirmation

↓

Order Created

30. BASIC PRODUCTION & FULFILMENT

Artisan updates:

- Production started
- In progress
- Ready
- Dispatched

Can optionally provide:

- Progress photos
- Quality-check photos
- Dispatch proof

No full manufacturing ERP.

31. ORDER MANAGEMENT

Artisan

New
Confirmed
In Production
Ready
Dispatched
Completed

Buyer

Pending
Confirmed
In Production
Ready
Dispatched
Completed

32. SAVED SUPPLIERS + REORDER

Buyer can:

- Save artisan
 - Save supplier
 - Reorder previous product
 - Repeat B2B purchase
-

33. OPTIONAL ARTISAN-INITIATED BIDDING

This is **secondary/advanced**, not default.

Artisan voluntarily creates it when:

- available stock
- available capacity
- seasonal opportunity
- surplus production
- standardized product

Flow:

ARTISAN

Select Existing Product

Set Available Quantity

Set Minimum Acceptable Price

Set Date + Time

Schedule Bidding Session

BIDDING SESSION

BUYERS SUBMIT SEALED OFFERS

SESSION CLOSES

ARTISAN REVIEWS OFFERS

SELECTS SUITABLE BUYER(S)

SELECTED OFFER

NORMAL QUOTATION → ORDER FLOW

34. BIDDING ACCESS CONTROL

No public unlimited bidding.

Only relevant/eligible buyers.

Possible criteria:

- Verified business
- Relevant category
- Relevant product interest
- Trust/reliability signals
- No serious risk flags

Participation can be limited.

35. BIDDING NOTIFICATIONS

T - 2 Days

→ Session scheduled

T - 1 Hour

→ Reminder

T = Start

→ Bidding Started

During

→ Relevant session updates

T = End

→ Session Closed

After selection

→ Result notification

36. SEALED BIDDING

Instead of a live price war:

Buyer submits:

- Quantity required
- Price offered
- Relevant terms

Then the session closes.

37. ARTISAN CONTROLS FINAL SELECTION

Highest price **does not automatically have to win.**

Artisan can consider:

- Price
- Quantity
- Buyer reliability/trust
- Requirement fit

Artisan can:

- Select one buyer
 - Select multiple buyers
 - Split quantity
 - Reject all
-

38. PRICE PROTECTION

Minimum acceptable price is controlled by artisan.

It can be informed by:

AI Pricing Assistant → **suggested sustainable range** → **artisan decides threshold**

No forced downward pricing.

39. BIDDING FAILURE CASES

No acceptable bids

Product returns to normal B2B availability.

Buyer backs out

Next suitable offer / normal B2B.

Artisan rejects all

Session closes without order.

Multiple buyers

Quantity may be split where appropriate.

40. BUSINESS INSIGHTS

This is our lightweight **ongoing Virtual Business Manager**.

After publishing, artisan gets simple information:

- Product views
- Buyer interest
- Inquiries
- Common buyer requests
- Basic product performance

AI can give actionable suggestions.

Example:

“3 buyers asked for more than 100 pieces.”

“Your product received 40 views this week.”

“You may want to review your MOQ.”

Artisan decides whether to change anything.

41. MARKETPLACE / GOVERNMENT CONNECTION

Seller-side linkage

Product

AI Catalog

Standard Product Information

Marketplace-ready

Supported Channel

Where an official API/approved integration exists:

Connect / Publish / Sync

Otherwise:

Prepare + Guided onboarding/submission

Buyer-side linkage

Buyer requirement can potentially be connected to permitted external sources where the relevant integration/data access exists.

We do **not** assume every platform provides an API.

42. ADMIN WEB DASHBOARD

Separate web dashboard using the **same backend/database**.

User Management

- Artisan accounts
- Buyer accounts
- Status

Verification

- Artisan verification
- Buyer verification
- Approve
- Reject
- Request correction

Product Moderation

- Flagged listings
- AI-output issues
- Content review

B2B Monitoring

- Requirements
- Inquiries
- Quotes
- Orders
- Activity

Bidding Monitoring

- Scheduled
- Active
- Completed
- Reported
- Suspicious sessions/activity

Trust & Safety

- Risk signals
- Reports
- Suspicious accounts
- Restrictions

Dispute Resolution

- Complaint
- Evidence
- Review
- Resolution

Marketplace / Integration Management

- Connection status
- Sync status
- Errors

Ecosystem Analytics

- Artisan onboarding
- Products published
- B2B requirements
- Connections
- Orders
- Conversion
- Category/region activity
